

## 7. STABILIZATION FUND

All fees collected from participants will be deposited in a stabilization fund. The fees collected are presumed to be sufficient to cover 1/3 of the amount required for stabilization payments. The Government of Ontario will provide the other two thirds. There is a separate fund for each crop.

Applications and registration forms for this 3 year plan beginning with the 1978 crop year will be available at all local agricultural offices about June 15th.

For further details contact your local agricultural office or the Farm Income Stabilization Commission, Ministry of Agriculture & Food.

## INCOME STABILIZATION FOR ONTARIO PRODUCERS OF SOYBEANS AND WHITE BEANS

The Farm Income Stabilization Commission has developed plans to stabilize the income of Soybean and White Bean producers. The plans are for a period of three years and if subscribed to in 1978 will cover the crop years, 1978, 1979, and 1980.

Participating growers in any year of depressed market prices may receive a supplementary payment from a stabilization fund. The amount of payment is limited by the Ontario support price. This price represents 95% of the five year average market price as adjusted for changes in cash costs.

Soybeans is a named commodity under the Agricultural Stabilization Act and the Federal Government support price will not be less than 90% of the 5 year average market price as adjusted for changes in cash costs.

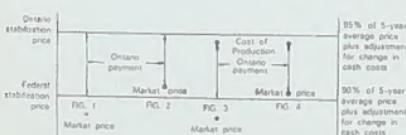

White beans is not a named commodity and there is, therefore, no guarantee the Federal Government, if they support the crop at all, will support it as high as 90% of the 5 year average price as adjusted for changes in cash costs.

In either case, the maximum Ontario payment will be the difference between 90% and 95% of the five year average price as adjusted for changes in cash costs.

### HOW THE PLAN WORKS

In Figure 1, if the market price of soybeans is less than 90% of the 5 year average price plus adjustment for cash costs the Federal Government will make a payment equal to the amount between the market price and the 90% level. Ontario will make a payment between the 90% level and 95% level.

In Figure 2, if the market price of either soybeans or white beans is above the 90% level Ontario payments will be calculated on the difference between the 95% level and the market price.

In any year when the cost of production is less than the Ontario support (95% level), the cost of production becomes the support level (Figure 3).

When the market price is less than the 90% level the Ontario payment is calculated on the difference between the cost of production and the 90% level.

In Figures 2 and 4 only provincial payments will be made. In Figures 1 and 3 there will also be Federal payments for the soybean crop. There may also be Federal payments for white beans if the Federal Government designates support for white beans to the 90% level.

### 1. MAIN FEATURES OF THE PLANS

Participating producers must make application for enrolment to the Farm Income Stabilization Commission and agree to:

- (a) remain in the plan(s) for the duration of the three year period.
- (b) file a registration form each year the plan(s) is in force.
- (c) forward with the annual registration form a fee to cover the quantity of crop expected to be sold in the crop year.
- (d) file all documents and fees within the time specified in the plan(s).
- (e) file complete and accurate reports.
- (f) allow free access to the farm for field inspection and/or auditing of required records.

### 2. WHO IS ELIGIBLE

These plans are voluntary and open to all soybean and white bean producers whose ordinary residence is Ontario.

Any individual who has minimum sales of 150 bushels of soybeans or 3 metric tonnes of white beans in a crop year is eligible. The maximum claim for payment for any individual is 12,000 bushels of soybeans and 160 metric tonnes of white beans.

Where two or more producers are operating a multi-farm operation as a joint undertaking such as a partnership or corporation, the Commission will increase the maximum amount on which payments can be made, provided each partner is:

- (a) a bona fide farmer,
- (b) supports a farm family unit,
- (c) derives his or her principle income from farming and
- (d) shows distinct and proportionate investment, management, labour and risk taking or profit sharing of the enterprise.

The maximum production eligible for payment in a joint undertaking is 36,000 bushels of soybeans and 480 metric tonnes of white beans.

### 3. HOW TO COMPLETE ANNUAL REGISTRATION FORMS

Each year a participant in a plan must file a registration form.

This form is to be completed and filed by August 1st. By August 1st the participant will have some indication of the prospects of his crops and the number of acres that he expects to sell.

The minimum bushels of soybeans per acre that an applicant may apply for will be indicated on the reverse side of the registration form opposite the county where the crop is grown.

The minimum tonnes per acre for white beans is .5.

An applicant may apply for as much crop per acre as he feels he is confident of growing.

A registration fee must be paid for the amount of crop applied for.

### 4. REGISTRATION FEES

#### SOYBEANS

In 1978 -- the enrolment fee is .05¢ per bushel for each bushel applied for. In addition in 1978 a deposit is required amounting to .025¢ per bushel for each bushel applied for in 1978 to be credited to the third year of the plan.

In 1979 registration fee is .05¢ per bushel applied for in 1979.

In 1980 registration fee is .05¢ per bushel applied for in 1980 minus the amount deposited with the Commission in 1978.

#### WHITE BEANS

In similar manner

1978 fee is \$3.00/metric tonne  
+ deposit for 1980 \$1.50/metric tonne.

1979 fee is \$3.00/metric tonne

1980 fee is \$3.00/metric tonne minus deposit collected in 1978.

### 5. FEE ADJUSTMENT

Where a producer applies for more crop than is actually sold in the crop year, a return of fee will be made providing the amount of credit is \$5.00 or more.

### 6. HOW TO FILE A CLAIM

At the end of each crop year a claim form will be forwarded to each participant. All sales during the crop year are recorded on the claim form and must be supported by proof of sales.
